

KEVIN.MURPHY ANGEL.MASQUE

Strengthening and deep conditioning treatment for fine, chemically treated or coloured hair.

A repairing and thickening conditioning treatment for fine, dry or coloured hair. Contains Quinoa Proteins, Tripeptides, Lotus Flower and Bamboo extracts. Paraben free. Directions: Apply to freshly washed hair. Massage into hair and scalp for 5-10 minutes then rinse.

Key features & benefits

Moisturising	Restorative	Repairing
Promotes hair growth	Strengthening	Thickening
	Reduces breakage	Paraben free

Key Ingredients

Penetrates and strengthens hair while creating a protective shield even in extreme humidity and is considered a protein derivative. It can maintain the hair in the growth phase. Tripeptides readily attach to the hair cuticle after washing and bond with chemically treated hair to repair some of the damage caused by these treatments. They bond more wherever damage is greater for optimal conditioning at all times - the greater the damage, the greater the binding but without build-up. They will help to close split ends and by swelling the hair shaft they give the impression of thicker hair.

Biotinoyl Tripeptide –1

Properties include anti-irritant activity, anti-oxidants and the prevention of damage to cell structure while protecting the integrity of the hair's health.

Bamboo Extract

Also contains abundant antioxidants and vitamins, and is also a rich source of flavone, phenolic acid, lactone, and polyose.

Binds to the hair shaft and penetrates the cortex, bringing moisture and repair deep into the hair while making it shiny. It is one of the best sources of protein and Amino Acids (the building blocks of repair), while being gluten free.

Hydrolysed Quinoa Protein

A highly soothing emollient that leaves the hair soft and supple. Lotus flower extract regenerates, heals, purifies, rebalances and refines hair texture. Test results indicate that Lotus Flower oil may prove useful in the development of grey hair prevention. It is a conditioning antioxidant. The Lotus Flower essential oil was shown to stimulate melanin synthesis and enzyme activity. Since all enzymes are proteins and the hair is made up of 90% protein, the Lotus Flower extract is a very important factor to help repair and rebuild the hair's surface.

Lotus Flower Extracts
