

KEVIN.MURPHY COLOR.BUG

COLOURED HAIR SHADOW

In the world of session styling I'm always looking for new ways to change the models hair. Wild crazy colour became the new hot thing but you cant just colour a models hair just because you feel like it. I wanted full on colour but without the commitment!

COLOR.BUG is wipe on, wipe off colour! It's just for fun and just for the one night. With a towel draped around your shoulders to protect your clothes, I would apply a hair product and then the COLOR.BUG to make it stick. The COLOR.BUG adds body to hair, you can keep this raw texture or add a fine mist of hairspray to lock on the colour.

Key benefits

Instant colour

Wipe in, wash out

Change your hair colour as quick as your make-up
